

## Winning Strides - Indoor Arena Rules

\*\*\* Please clean up after your horse\*\*\*

To avoid disturbing the other riders, go toward the centre of the ring to mount or dismount. If using a mounting block do so in a way that disturbs the other riders as little as possible

Generally, slower moving horses work towards the inside of the ring.

Be aware of other horses in the arena and keep a safe distance.

If horses are working to both ways of the ring, left-to-left is considered the correct way to go, meaning horses going counter-clockwise should use the outside track of the ring while riders going clockwise should use the inside track.

If a rider falls from his or her horse, stop all movement in the arena immediately.

Before entering the arena check the schedule to make sure the area has not been booked. When the arena has been 'booked' it is an exclusive booking. You may ride during this time ONLY with permission from the person who has booked the time.

Lessons can be held during open riding times providing the lesson does not interfere or restrict other riders.

Lounging of a horse in the arena requires the consent of all persons using the arena.

We recommend for reasons of safety, that all riders have supervision when jumping. Safety approved riding helmets are mandatory when jumping.

Please take down and put away any jumps/equipment after use unless it has been indicated the equipment should remain out.
